Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 and 3-7 are rejected under 35 U.S.C. 102(a) as being anticipated by applicants' own admission.

Applicants' specification acknowledges Figs. 1-3 as "Prior Art" and Fig. 2 may be read on claim 1 in the following manner: a digital filtering circuit [Fig. 2] comprising a discrete transform means (DCT2N) [DCT2N, element 23], an inverse discrete transform means (IDCT2N) [IDCT2N, element 23] and a first and second odd filtering modules [ZER, element 25]. Element 25 effects filtering of the odd transformed data W by zeroing the odd transformed data which is higher in frequency than the predicted maximum frequency. Page 3, lines 24-29 describe element 25 as being effected by means of logic circuits. Therefore, the logic circuits that filters the last odd or last 3 odd may be considered a first module and the logic circuits that filters the last 2 odd may be considered a second module and the two modules are connected by virtue of being connected to common elements.

Claim Rejections - 35 USC § 112

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1; lines 3-4 are grammatically incorrect. In claim 1 it is unclear as to what is being referenced by the "having" phrase of line 6. Lines 7-8 of claim 1 are mis-descriptive because the set of transformed data is filtered. Claim 2, lines 1-2; the phrase "the discrete transform means (DCTN)" lacks clear antecedent basis.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
